STATE OF MARYLAND,

OFFICE OF THE STATE BOARD OF EDUCATION,

BALTIMORE, December 31, 1889.

To His Excellency, ELIHU E. JACKSON,

Governor of Maryland:

SIR: I have the honor to transmit to you the Annual Report of the State Board of Education, for the school year ending July 31, 1889, and the fiscal year ending September 30, 1889, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

M. A. NEWELL,

Secretary.

REPORT

—OF THE—

State Board of Education.

The following summary, in connection with the accompanying tables, exhibits in a condensed form the most important facts connected with the administration of the public school system of the State, for the school year in the city of Baltimore ending December 31, 1888, and in the counties ending June 30, 1889; and for the fiscal year ending December 31, 1888, in the city, and on the 30th of September, 1889, in the counties. The several items are compared with the corresponding items for 1888.

Number of schools in Baltimore city	140	
" " " the counties	2,060	
Total		2,200
Being an increase in 1889, of 41		
Number of different pupils, city	59,906	
" " " counties	119,554	
Total		179,460
Being an increase in 1889, of.....2,873		
Highest number enrolled in one term, city	46,521	
" " " " " counties	105,554	
Total		152,075
Being an increase in 1889, of.....3,833		
Average number in daily attendance city,	37,892	
" " " " " counties	61,328	
Total		99,220
Being an increase in 1889 of.....4,244		

Number of teachers, city	1,123	
" " counties	2,605	
Total		3,728
Being an increase in 1889 of .60		
Number of months schools were open, city	10	
" " " " " counties	8.9	
Average for the State		9.3
Being an increase of one-tenth of a month in 1889.		
Receipts from all sources, city	$ 749,895 13	
" " " counties	1,069,457 83	
Total		$1,819,352 96
Being a decrease in 1889 of $251 74		
Amount paid for teachers' salaries, city	$667,614 15	
Amount paid for teachers' salaries, counties	$721,888 33	
Total		$1,389,502 48
Being an increase in 1889 of $44,996 68		
Amount paid for building, repairing and furnishing school-houses, city	$85,412 15	
Amount paid for building repairing and furnishing school-houses, counties	105,510 55	
Total		$ 190,922 70
Being an increase in 1889 of $27,369 26		
Amount paid for books and stationery, city	$ 38,986 59	
" " " " counties	48,576 45	
Total		$ 87,563 04
Being a decrease in 1889 of $2,325 84		
Amount paid for rent, fuel and other incidentals, city	$ 64,110 79	
Amount paid for rent, fuel and other incidental expenses, counties	60,714 48	
Total		$ 124,825 27
Being an increase in 1889 of $2,904 26		
Total expenses for Public School purposes, city	$ 800,796 48	
Total expenses for Public School purposes, counties	1,034,234 26	
Total		$1,835,030 74
Being an increase in 1889 of $6,852 44		

Excluding the city of Baltimore, the county schools show the following results:

Number of schools	2,060	
Increase in 1889		29
Total number of scholars enrolled	119,559	
*Decrease in 1889		2,823
Highest number enrolled in one term	105,554	
Decrease in 1889		1,133
Average number enrolled	94,381	
Decrease in 1889		1,024
Average number in daily attendance	61,328	
Increase in 1889		321
Number in first grade	25,138	
Increase in 1889		1,376
Number in second grade	16,380	
Increase in 1889		511
Number in third grade	17,935	
Decrease in 1889		55
Nember in fourth grade	18,087	
Increase in 1889		408
Number in fifth grade	13,911	
Decrease in 1889		699
Number in sixth grade	9,174	
Decrease in 1889		428
Number above sixth grade	4,125	
Increase in 1889		963
Number studying book-keeping	1,794	
Decrease in 1889		5
Number studying algebra	4,569	
Decrease in 1889		182
Number studying philosophy	3,018	
Increase in 1889		276

*This apparent decrease is caused by the annexation of a part of Baltimore county to the city.

Number studying drawing	4,488	
Increase in 1889		075
Number studying geometry	1,525	
Increase in 1889		166
Number studying physiology	15,518	
Increase in 1889		902
Number of teachers (including assistants)—		
Men—white, 770; colored 202; total	972	
Women—white, 1,377, colored 256; total	1,633	
Total	2,605	
Decrease in 1889		56
Average number of months schools were open	8.9	
Increase of one-tenth of a month in 1889		
Amount received from State school tax, (white schools), free school fund, and academic donations	$ 330,245 94	
Decrease in 1889		$ 6,802 23
Amount received from State school tax appropriated to colored schools	$ 98,565 07	
Increase in 1889	20,017 43	
Amount received from county tax	$ 428,625 73	
Decrease in 1889		$ 72,158 16
Amount paid for teachers' salaries	$ 721,888 33	
Decrease in 1889		$ 18,283 07
Amount paid for building, repairing and furnishing school-houses	$ 105,510 55	
Increase in 1889		$ 8,421 29
Amount paid for books and stationery	$ 48,576 45	
Decrease in 1889		$ 1,008 05
Amount paid for supervision and office expenses	$ 40,972 62	
Decrease in 1889		$ 1,916 76
Amount paid for incidental expenses, including fuel and rent	$ 60,714 48	
Decrease in 1889		$ 1,701 55
Amount paid for interest	$ 3,487 45	
Decrease in 1889		$ 1,721 00
Amount paid for miscellaneous expenses	$ 8,841 91	
Increase in 1889		$ 4,923 43

Amount of indebtedness paid	$ 44,242 47	
Decrease in 1889		$ 1,054 21
Total expenditures for public school purposes in the counties	$1,034,234 26	
Decrease in 1889		$ 12,339 92

The items of expenditure which show an increase are:

Buildings, repairing and furnishing	$ 8,421 29	
Miscellaneous	4,923 43	
Total		$ 13,344 72

The items which show a decrease are:

Teachers' salaries	$ 18,283 07	
Books and stationery	1,008 05	
Supervision and office expenses	1,916 76	
Incidental expenses	1,701 55	
Interest	1,721 60	
Indebtedness paid	1,054 21	
Total		$ 25,684 64
Showing a net decrease of expenditure in 1889		$ 12,339 92

The Board refers to the Report of last year for an account of the various Acts of the last General Assembly in connection with public education; and to the very interesting reports of several School Examiners in reference to the progress of schools in their respective counties. The usual statistical tables give all the information that can reasonably be desired, and in very minute detail.

(Signed,)

ELIHU E. JACKSON, GOVERNOR, *President.*

JAMES L. BRYAN,

WILLIAM DALE,
JAMES A. DIFFENBAUGH,
M. A. NEWELL, *Secretary.*

ALLEGANY COUNTY—H. G. WEIMER.

Those who expect great educational reforms to spring up and be perfect in a day or a year, will most certainly be disappointed. These changes are naturally slow. If we compare the condition of our schools now with what it was a year ago, very little difference will appear; but if we compare it with what it was twenty years ago, the difference becomes very apparent. This truth is not sufficiently understood by our critics. Since we have had the honor of acting as Examiner, we have labored for the educational welfare of the children of the county, with unsparing effort. The result we have achieved affords us no little gratification. Slowly, steadily, but none the less surely, have we seen the teachers improving; until, this day, they will compare favorably with any corps of teachers in the State; and as a necessary consequence the schools under their care will stand the test.

Visitation—In order that we might be better able to understand the classification and general management of the schools, teachers were required to have a written programme of exercises and classification of pupils prepared for our inspection upon visiting the schools. To excite emulation among teachers and pupils, and to direct their attention to some of the most necessary requisites to a good school, a report was made on the following items:

Condition of room, order, recitations, interest in class, industry and manners. This report was generally written on the blackboard, the degree of proficiency being indicated by figures. This plan worked admirably; in most schools marked improvement was noticeable upon our second visit to the schools; and for the good condition in which most of the rooms were kept, and the general good order preserved in the schools, our teachers deserve much praise.

The *County Institute* for the year was held in Cumberland. The exercises consisted in developing what we considered the best methods of teaching the different branches pursued in the schools of the county; in answering a list of questions on school affairs, previously prepared for the institute; and debating questions on the necessities of our county's work.

The Cumberland Reading Circle and District Institutes have awakened a greater interest in school matters, and will no doubt produce good results.

BALTIMORE COUNTY.—CHAS. B. ROGERS.

Under the provisions of the City Extension Act, the territory known, as the Belt, was annexed to Baltimore city, on June 1st,

1888. In this section there were fifteen Public School Houses, thirteen for white and two for colored children, which houses and lots had cost this Board $73,800; the Board of County Commissioners of Baltimore county were paid by the Mayor and City Council of Baltimore city for these buildings and lots the sum of $68,250, a portion of which has been appropriated for the payment of the long standing debt of this Board. The amount paid by the Board of County Commissioners of Baltimore county to the Board of School Commissioners out of the sum received from the Mayor and City Council of Baltimore city was on April 4th, 1889, $20,000, on April 24th, 1889, $22,000, making in all from City Extension Fund, $42,000. The sum of $15,000 uncollected by this Board and levied for in the levy of 1888, for Public School purposes, was placed to the credit of the general levy by the Board of County Commissioners in making the levy for 1889. The books having been collected from the Belt schools, such, as were fit for use, were redistributed amongst the several schools of the county, at a saving to this Board of $2,736.36. Sundry bills against the Belt schools, dating from a period prior to annexation, were paid to the amount of $257.93. Prior to April 28th, 1889, $460.33, was paid for interest on money borrowed to meet payment of teachers' salaries.

The account known as Office Accounts, for the fiscal year ending September 30th, 1889, was $5,960.94. This account embraces the salaries of the board and its officers, attorneys' fees, stationery and blanks, school house insurance, recording deeds, cost of hauling together and assorting books from the Belt Schools, interest on borrowed money, and office rent and expenses. The value of old books re-issued, was $2,736.36, and a rebate on arithmetics $995.50, together amounting to $3,731.86. The net cost of running the Public Schools of Baltimore county, for fiscal year ending September 30th, 1889, including the office account and not including building, interest and Belt Schools accounts, was $121,358.87. The per capita cost based upon an average enrollment of 8,257 pupils was $14.13. The aggregate amount of book fees collected during the year was $12,800.03.

CALVERT.—Benson B. D. Bond.

Since my appointment in January last, I have devoted the greater portion of my time in this office. It is needless for me to enter into detail about the condition in which I found the system, for you are fully aware of it yourself.

We have promptly met all indebtedness as the same accrued, and the financial condition shows a healthy balance at the end of the fiscal year.

The official visits of the examiner I regard of importance. The school is benefited by a judicious examination, and receives a new impetus, as has been attested by the teachers.

CAROLINE.—M. B. STEPHENS.

A comparison has been instituted between this and the reports for the previous years, and it is found that the increase, annually, in the number of pupils attending our schools is far ahead of the increase in the general population; that the average attendance of pupils steadily approximates to the enrollment; that our school houses are more numerous and afford greater comfort and convenience, and the efficiency of our schools, generally, is promoted.

During the year just closed two new school districts were formed, and four new single-room houses built, and furnished at a cost of $3300. Four others have been repaired and supplied with new furniture, and there now remain but three houses used for white schools that do not afford proper school facilities.

We will not relent in our work until every district shall have a school building combining attractiveness, convenience and adaptability to the purpose intended. It is, indeed, gratifying to know that our efforts in this direction have been appreciated, and our appeals for funds to prosecute our work responded to satisfactorily. Our people are gradually awakening to the importance of a higher appreciation of our school system, and will, in the near future, demand that our teachers be paid a fair compensation for their services. They plainly see, that, surrounded as we are by those counties that pay larger salaries, we are in constant danger of losing our most efficient teachers.

During the scholastic year I visited every white school, at least twice, and the colored schools once each. By this means I believe co-operation can be best secured, and plans looking to a proper development of the schools most effectively carried out. Apart from any other consideration these visits are helpful for the same reason that the presence of any person deeply interested in the welfare of the school has a salutary influence on both teacher and pupil. Anticipating such visits the teacher will strive zealously that his meetings may be approved, and the pupils will labor earnestly that the character of their work may be commended. I find, too, that our teachers are always anxious for advice and ready to adopt any suggestion which has for its object the improvement of the school. Aside from this, however, I find that these visits are essential to the progress of the school. In the way of illustration I will mention that when I

first visited the schools, three years ago. I found the grading defective and very unsatisfactory. With a desire to secure uniformity in this direction I prepared a schedule of grades conforming to the requirements of the By-Laws of the State Board of Education, and applicable to the text books used in our county; and sent copies thereof to our teachers with directions that they follow it as nearly as practicable in grading their schools. In my subsequent visits I have taken the pains to learn whether or not they have been guided by it, and I now have the satisfaction of knowing that our schools are uniformly graded. I have also been able to have our school houses made secure (a duty which our trustees sometimes neglect) and amply provided with sufficient furniture, black-boards, maps and globes.

At the beginning of the school year we held a County Institute, lasting three days, which was well attended and productive of much good. Our teachers immediately entered upon their work enthusiastically, full of devotion and with a determination to accomplish more than during any previous year. I am free to say that the character of their work shows perceptible signs of improvement in their teaching, and their services as teachers are more popularly recognized than at any previous time since I became Examiner.

Arbor Day was generally observed by our schools and I estimate that 200 shade trees were planted on our school grounds. Interesting programs, prepared especially for the occasion, were carried out, and the people generally showed their interest in making our school grounds attractive by their presence.

Before the keynote was sounded for The Maryland State Teachers' Reading Circle, in a paper read by Prof. Alexander Chaplain before the Maryland State Teachers' Association held at Mountain Lake Park, our teachers felt the need of instruction in pedagogic work. Most of them were without the advantages which normal training gives, and they contemplated a course of reading which would better qualify them for their profession.

A County Teachers' Reading Circle was organized, but they soon saw that the organization was not broad enough in scope to accomplish their purpose. About this time a State Circle was formed, and every teacher in the county joined it. Various local circles were organized and most of our teachers attended their meetings. Those who could not conveniently be present pursued the course alone, and nearly all of them are ready for the second year's course.

In a circular letter addressed to the teachers during the year I made the following remarks on the subject of School Libraries:

"For the further encouragement of education the Public School Law authorizes School Boards to aid financially in the establishment of school libraries. Any school district which collects ten dollars for this purpose will receive a like sum from us, and the same shall be spent for books to be selected by the trustees and teacher. The chief aim of an education is to make us think, and this object cannot be accomplished in any better way than by cultivating a taste for reading. A library of good books under the supervision of the teacher as librarian, is a valuable aquisition to a school-room, and may be used as a powerful factor for the development of the pupil. Wherever it is practicable you are earnestly urged to use your efforts to establish such a library, and you are at liberty to command my services in any way which will promote such an enterprise." We have seven school libraries and we expect to double this number during the next school year.

CECIL—Rev. John Squier.

There has been a slight falling off in the number of pupils during the year, but all parts of school work have been carried on successfully, and the schools are in good condition. You will see by the report that a larger number of new school-houses have been built this year than usual, and the whole county now is nearly covered with new houses, well supplied with new and approved furniture.

FREDERICK—Glenn H. Worthington.

The statistical tables show that the total number of different pupils enrolled during the year was 9,997, an increase over last year of 229; and that the average attendance was 5,548, or 134 greater than last year. The increased number of pupils necessitated the employment of additional teachers, and the table will show the total number for the past year to have been 211, against 204 for the preceding year; of these, 184 are white, and 27 colored teachers.

The number of school-houses owned by the School Board is 147; there are, besides, 11 rooms occupied for school purposes, for which rent is paid. Of the buildings owned by the Board, 135 are in good condition, while the remainder (12) need to be repaired, or to be replaced by new ones. New houses are also needed in the districts where rent is now paid for the use of rooms.

The financial statement shows that the total amount expended for school purposes during the year was $66,914.66, or $2,026.62 more than last year. This increase is accounted for in the two

items of "Teachers' Salaries," and "Books and Stationery." The employment of more teachers, and a slight advance in teachers' salaries, increased the total paid for salaries by $1,198.15.

The cost of books includes the purchase of a supply of wall maps of the United States, for use of the schools, and the exchange of the spelling book, long in use, for Sheldon's Word Studies.

This item is, in consequence, larger by about $800, than last year. The aggregate of the remaining items of expenditures, is about the same.

Prior to 1888, the annual statements of this Board since 1878, had invariably shown it to be considerably in debt at the close of each fiscal year. Last year the statement showed the Board to be free of debt, with a small balance on hand, and the statement for the present year shows a slightly increased balance to its credit.

For this gratifying condition of the finances, credit is due to the present Comptroller of the State Treasury, Hon. L. Victor Baughman, under whose efficient management, larger sums have been apportioned annually to the several counties for school purposes, than for several years previous; and to the County Commissioners, who have given a substantial recognition of the importance of popular education, by granting the School Board, each year, an appropriation sufficient, together with the revenues from other sources, to defray the ordinary expenses of keeping the schools open seven and a half months.

The increased appropriation for colored schools, granted by the Legislature of 1888, has also aided in relieving the financial embarrassment under which the School Board has so long labored. Although the county levy for school purposes, together with all other moneys received from various sources for the same purposes, is now sufficient to maintain the schools for three terms, and the current year possibly a few weeks longer, yet their maintenance with the present revenues for that length of time, is done at the sacrifice of their highest efficiency.

A comparison with different counties will show that the levy in Frederick county is less than in most of the other counties of the State. Thus, in Washington county the levy is 20 cents on the $100; in Montgomery county, about 24 cents on the $100; while in Frederick county it is 14¾ cents on the $100. The cost per capita of schooling children in the public schools of Washington county for 1888, was $9.20; in Montgomery, $8.70; in Baltimore county, $14.56; and in Frederick county, $7.66.

The fact that the cost per capita in this county is less than in other counties affords, however, no reason for boasting, as with

better equipped school-houses, and better paid teachers, improved school facilities could be provided. But, owing to the damage done to bridges by the floods of the past summer, and the increased expenses incurred by the county on that account, no larger appropriation can reasonably be expected at this time. It is to be hoped, however, that the importance of supporting the public schools will not be subordinated to that of mending roads.

The High School department, established last year in the public school at Middletown, is being well patronized by the people of that community. The advantage of having facilities for the higher education of boys and girls, at a minimum cost, is appreciated by those who have children to educate, and many requests for the extension of such facilities have been made to this Board. The present year a High School department has been established in the female public school on Church street, in Frederick city, which offers its advantages to girls from any part of Frederick county.

The charges for tuition in these High Schools have been fixed at $2.50, $3.00 and $4.00 per term, according to advancement. The aggregate of these fees has, so far, been sufficient to maintain these High Schools, without adding anything to the cost of the public school system of the county.

A High School for boys, and a more commodious one for girls, is much needed in Frederick city, and the recommendation of the Secretary of the State Board of Education, to the effect that "the few remaining county academies should be made a part of the public school system," is heartily concurred in by this board.

By Special Act of the Legislature of 1880, chapter 404, the County Commissioners of Frederick county are authorized to appropriate annually, a sum not exceeding $10,000, for the building and furnishing of new school-houses. Under this Act, four new houses were built and furnished during the past year, the total cost of which will approximate $3,500.00.

The recommendation in the last report of this Board, that the next Legislature amend the Act of 1880, so that the money appropriated for the building and furnishing school-houses should be expended by the School Commissioners, and the houses constructed and furnished under their supervision, is here repeated. The ordinary business of the County Commissioners precludes the possibility of their giving prompt attention to this extra duty; and, in consequence, there is often considerable delay in occupying the new houses, and much discomfort experienced by pupils, owing to unsatisfactory furnishing. It is hoped that the Legislature of 1890 will give the matter its attention.

Altogether, our schools are doing as well as could be expected under existing circumstances. Teachers seem to have more generally the desire for improvement; and many of them are pursuing, systematically, the course of reading adopted by the Directors of the State Teachers' Reading Circle. It is found that the most successful teachers are those who are constantly striving for self-improvement. The practical utility to teachers of a careful and systematic course of reading cannot be questioned, and it is gratifying to note a growing appreciation of this fact The present year, it is believed that a large proportion of our teachers will be found pursuing the course prescribed by the Directors of the Reading Circle.

The following is the curriculum of the High Schools of Frederick county:

FIRST YEAR.

LANGUAGE.—Patterson's Advanced Grammar and Elements of Rhetoric. Exercises in Composition.

HISTORY.—Eggleston's United States and Dickens's History of England.

GEOGRAPHY.—Appleton's Higher completed and reviewed, or Houston's Physical to Part IV.

LATIN (optional.)—Harkness' Introductory Latin Book.

MATHEMATICS.—Arithmetic reviewed and completed. Geometry, 2 books. Original problems. Algebra, (Wentworth's,) to chapter XI.

BOOK-KEEPING (optional.)—Meservey.

PHYSICS.—Steele's 14 Weeks in Philosophy, through Acoustics.

READING, WRITING AND SPELLING as prescribed for "Above Sixth Grade" for Public Schools.

SECOND YEAR.

LANGUAGE.—Hart's Composition and Rhetoric to chapter IV. Analysis and Parsing. Use Patterson's Advanced Grammar for reference.

HISTORY.—Anderson's General History, Part II. Mediaeval and Modern. Anderson's, or Green's Short History of England.

PHYSICAL GEOGRAPHY.—Completed.

LATIN (optional.)—Chase and Stuart's or Harkness' Grammar and Reader. Chase and Stuart's Cæsar, 5 books.

LITERATURE.—Raub's English and American, with analysis.

MATHEMATICS.—Arithmetic Exercises. Geometry, Plane completed. Original Problems. Algebra, (Wentworth's,) through quadratics to Chapter XVI.

THIRD YEAR.

LANGUAGE.—Hart's Rhetoric, completed. Morris's "Elementary Lessons."

HISTORY.—Anderson's General History, Part I. Ancient. Short Histories of Greece and Rome.

LATIN (elective.)—Chase and Stuart's Virgil. 3 books of the Æneid.

SCIENCE.—Hooker's Natural History, and Wood's Botany, (elective).

LITERATURE.—Raub's English and American, and Shaw's History of English Literature.

MATHEMATICS.—Arithmetic Exercises. Plane Trigonometry, (elective.) Algebra, (Wentworth's,) completed and reviewed.

CIVICS.—Government of the United States, (Macy).

Pupils must take at least one of the three elective studies in this year.

It is proposed to award Diplomas to such as satisfactorily complete the course prescribed. The charges for *tuition* are as follows: First Year, $2.50; Second Year $3.00; Third Year $4.00 per term, payable in advance.

Pupils from any part of the county will be admitted to the High School Department provided they have made sufficient progress in the elementary branches to take the course prescribed. Pupils living in the School Districts where the High Schools are located will not be required to enter this department unless their parents so desire.

HARFORD—JOHN D. WORTHINGTON.

It is fair to infer, from the universal patronage the public schools now receive, that they are reasonably well meeting the wants of the people; they have so generally supplanted private schools that there are not now in Harford a hundred enrolled pupils outside of their pale. The past year has exceeded all previous ones in the patronage of our schools; every term but one showed a higher enrollment than the corresponding one for the previous year; and every term, without exception, showed a higher average attendance.

More money which would be the means of securing to us permanently our best teachers, and a more prevalent custom to attend from the beginning to the end of the year, rather than for a term or so at a time, would greatly enure to the efficient work of the schools; but we will look for these when the people become more ready and able to stand an increase in the school tax as they appreciate more fully its general benefits.

Many of our wealthy citizens who have no children in school, are among the most cheerful school tax-payers, because they recognize the benefits of the public schools to themselves as well as to school patrons.

Our rule is to follow the dictate of the law and hold our annual institute during the first week of September. This is our normal training school where all are both students and teachers. After having feasted for a week upon the theories of the enthusiastic beginner on the one hand, and the more temperate but not less valuable advice of the experienced teacher on the other, together with the able help always rendered by the Faculty of the State Normal School, our teachers begin their work with a unanimity of sentiment and a full comprehension of their varied duties which naught but many costly blunders in the school-room would have otherwise taught them. Following this up with a weekly report by postal card to the Examiner from each school, he practically gets a bird's-eye view of them all once a week, and can direct his attention to the schools most needing it. The value of official visits goes without saying, the trouble is to find the time to pay them.

With 105 schools under his charge, and having no assistant, an examiner is busy indeed who can keep up the other work and pay many visits of several hours each to the different schools.

We aim in good faith to carry out the School Law in Harford; and with promotions made only on the result of semi-annual and annual examinations based on questions issued by the Examiner, we have the right to expect a fair degree of uniformity in our schools.

The best public display of school work is to be seen at our County Fair, to attend which two days' holiday are usually granted.

Anything which is the handiwork of a school child, as such, is received and exhibited; and the varied nature of the display, the high grade of the work and the general interest in the Public School Department are among the best evidences given of the hold the schools have on the hearts of our people.

Our school-houses for the most part, are owned by the county, and are well adapted to their purpose. We have this year added four good new houses (two new schools) for white schools, and a much needed improvement for the Belair Colored School.—While experience sometimes proves the great need of new schools, (the one opened in South Delta this Fall having enrolled upwards of 50 pupils the first week), the tendency to multiply schools frequently has a tendency to cripple them. We now have 22 more schools than in 1876, or an increase of 26½ per cent while the revenue to run them has increased only 18 per cent. Our teachers are paid according to the average attendance, and a

moderate number of fair sized schools gives us much better teachers and schools than a large number of small ones possibly can.

The colored schools suffer from a lack of means, and frequently for want of good teachers. The former trouble will continue until the State gives us more help, and the latter until there is a satisfactory source whence to draw a corps of teachers.

The Reading Circle in this county has not been able to overcome the difficulties incident to holding regular weekly or bi-weekly meetings, but it has been successful in furnishing many of the teachers with a valuable course for private study, while some 15 different schools are elevating the literary tastes of the neighborhood in which they are located by well selected district school libraries. These libraries are doubly appreciated because they are the fruit of the pupils' own efforts aided by the Board.

Our best schools, as a rule, are those made so by the united efforts of good teachers, appreciative patrons and active trustees; it would give a wonderful impetus to the cause if trustees generally would do all in their power to advance the interests of their schools.

Our apparent deficiency in funds for the fiscal year is not real; the Board had made advances prior to October 1st, on bills properly payable this year, which, with a small amount still due them, shows a real balance in their favor of $1,794.86. If the fiscal and school year were made by the next Legislature to more nearly correspond, this and several other similar difficulties would disappear.

KENT—Eben T. Perkins.

A very full report having been made last year, there is but little now to add to the statistical tables.

One frame school-house was destroyed by fire during the year, which has been replaced by a very neat structure and furnished with the latest improved furniture.

Our County Teachers' Association met as usual, five times during the year.

MONTGOMERY COUNTY—John J. Higgins.

The statistical report of the public schools of this county herewith presented will show them to be in a prosperous condition.

The small number of visits made by me to the schools during the past year is accounted for by the fact, that during the fall and winter of 1888, an exchange of readers and histories in use

in the schools was made, involving the handling of very nearly 15,000 books; and during the winter and spring my health was such that I could not with safety venture out in the weather.

PRINCE GEORGE'S COUNTY—THOS. S. STONE.

The progress of education in this county was very marked from the inauguration of the present system up to the year 1882. From 1886, (the time of my reappointment) to the present, the advancement has not been so evident. But while the advancement has not equaled the wishes of its warmest and most intelligent supporters, it has been sufficiently marked to secure popular favor.

County Commissioners have given in the past three years for support of public schools more than the financial condition of the county really justified.

For the past three years schools for white and colored children have been open for four terms each year. By comparing the tabular matter of this with that of other counties, it must be admitted that the management of our finances compares favorably with that of any other county in the state.

The school houses with few exceptions are in good repair, well furnished and supplied with the necessary school appurtenances. During the time specified the county has paid to the teachers of the white schools an average salary of over four hundred dollars per annum. The entire indebtedness of school board to date is two thousand dollars ($2,000.)

The good results accomplished in any county are mainly due in my opinion, to the examiner's visits to the schools and the judicious action by the school board on his reports. But the greatest good will not be obtained, I think, until the office of examiner and secretary is made distinct from that of treasurer; and until books are provided as other furniture, without expense to the pupils.

During the past year the teachers have met three times in county associations and held an institute at close of school term. These associations were productive of good. Much of the prejudice against teachers' meetings was done away with by the exhibition made at the institute which was held in Upper Marlboro'. Several able speeches were made at the time by prominent citizens of the county in favor of public schools.

Nothing has been done, and nothing will likely be done in in the near future, towards introducing manual and industrial training in our schools. Teachers seem to have as much as they can attend to at present in carrying out the established curriculum.

School Libraries are being formed in every section of the county, faster than School Commissioners can meet their moneyed obligation towards them.

There is a change I should like to see made in the school law. In sec. 6, of chap. XI, insert after the words "State of Maryland," the following:

"In some reliable guaranteed Trust company, or with at least two securities to be approved by said board."

QUEEN ANNE—L. L. BEATTY.

A greater interest is manifested throughout the whole county in school work; the result is seen in better supervision, beautifying the grounds, and building better houses, and in general school work.

TALBOT COUNTY—ALEXANDER CHAPLAIN.

Our Normal Institute for colored teachers was opened on the 31st day of July, and closed on the 23rd day of August. Instruction was given in the branches of study taught in our public schools, and in methods of teaching. Lectures were given upon school management and school discipline, and all of the teachers in attendance said that they would go back to their schools with broader views concerning the nature of their work, with added power for doing good service, and with fresh enthusiasm for successful labor.

Our regular annual Teachers' Institute was opened by the principal of our State Normal School on the 28th day of last August. The attendance was large; and at its close every teacher, I think, was a convert to the "new education," and had resolved to enter the lists with the "reformers." There are now two widely separated schools in our profession, and, for the purpose of distinction, let us call them—the reformers and the conservatives. These names are suggested by something recalled from Carlyle: "Reform is a nation's repose." We recognize the Teachers' Institute as, perhaps, the most potent agency provided by law for the improvement of our teachers. But we have still much to hope for from the independent exertions of our own profession. The teachers of Talbot county have never failed to respond when any measures have been proposed for their own improvement or that of their schools; and the plan of our State Teachers' Reading Circle has been enthusiastically received by them. If this plan, so broad in its design and yet so practicable, continues to be pursued with anything like the enthusiasm with which it has been undertaken, our teachers as a

body, within a few years, will occupy a plane of professional knowledge and literary culture hitherto unknown in this State.

Our County Teachers' Association continues to meet four times during the school year of ten months, and steadily increases in interest. At these meetings we hold two sessions, one in the morning and one in the afternoon; and it has been determined to devote, hereafter, one of these sessions to Reading Circle work for all of the teachers of the county together. One such meeting has been held already; and, in the language of one of our newspaper reports, it was "a successful experiment."

We have reported 1,356 pupils who received instruction in drawing. The display of school work at our County Fair, coming, as it did, from so many busy little hands in every section of the county, was very interesting; but none of it attracted so much attention as the free hand drawing. The plan of our school exhibit at our County Fair was given in our report last year. The plan for this year was the same, with some modifications and additions. Provision was made for the display of work from the Manual Training Department of our County High School, which had been in operation for one year; and also for work from our ninth and tenth grades in all of our High Schools, which were not included in our scheme for last year, as follows:

EXHIBIT FOR PUPILS OF NINTH GRADE.

Specimens of composition, advanced work, essays.

Specimens of translations of Cicero "Orationes in L. Catilinam."

Specimens of drawing, perspective and mechanical.

Specimens of drawings in physics.

Specimens of bench work, mitering, dove-tailing, &c.

TENTH GRADE.

Specimens of composition, advanced work, essays.

Specimens of translations in Latin, Virgil.

Specimens of translations in French, Moliere, Racine, &c.

Specimens of drawing, mechanical and historic ornament.

Specimens of drawings in astronomical maps and charts.

Specimens of advanced bench work.

In our official relations to the schools, I think that I am speaking for the School Board as well as for myself, when I say that we have not been content with merely following the routine of duties as prescribed by law, but have set up in our minds a high ideal—the standards of perfection we would have our

schools attain, and have bent our energies in the direction of such elevation. To this end, our purpose and endeavor has been, and still is, to bring to the children of the county absolute physical comfort in the school-room, and to secure to them the best teaching talent attainable.

In my school visitations, my principal aim is to get at the teacher for the purpose of elevating the tone and spirit of the school. The teacher should never lose sight of the fact that his chief office is character building. You, as State Superintendent of Public Schools, have instructed me to note among other things, the "order" and "progress" of every school visited.

1st, "Order:" This means, I think, to note in your visit the power of the teacher to get and keep the attention of the pupils during periods of recitation; the skill and tact of the teacher in gaining prompt and cheerful obedience from the pupils; and the greatness, steadiness and interest in their work, during periods of study and "busy work."

2nd, Progress: This means, I think, to note in your visit the spirit of the school as to the teacher, and as to the advancement in self control on the part of the pupils; and the condition of the grade work by actual examination and inspection.

In estimating the work of the teacher, the Examiner should note in his visit the manner, methods, disciplinary power, and the interest of the teacher in the work.

There can be no real and satisfactory teaching, unless the teacher thoroughly prepares the lesson and appears before the class with a definite "method" or plan; otherwise the teacher will not be able to *teach* the topic, but can only *hear* the lesson.

Then, as to methods in teaching, there can be none which are free from grave defects where the teacher has no special preparation for the lesson. Granted, then, that the teacher has thoroughly prepared the lesson, and appears before the class with a definite plan; the point of criticism for the Examiner, who is present, would be as to whether the plan is logical or not.

Granted, then, that the plan of the teacher is logical; the proper method of teaching would be as follows:

First. Question rapidly on previous topics, and lead up to the topic in hand. These questions may be chiefly answered simultaneously by the class.

Second. Teach thoroughly the topic in hand, in accordance with the plan previously determined upon; question, challenge the class individually.

Third. Dwell with emphasis on the important points of the topic.

Fourth. Close with a rapid and interesting *drill* upon the topic in hand.

In school visitations, the Examiner should never forget to cultivate that mutual confidence and respect which should always exist between him and the teachers. In no other way can he get at the teachers, and stimulate them to seize upon everything that promises to improve their efficiency. What the Examiner does for the school, must be done through the teachers; and his highest duty is to grasp the essential conditions of a rapid and permanent growth of the spirit of progress among them.

WASHINGTON—P. A. WITMER.

A comparison with the statistics of the previous year will show an increase in the number of pupils enrolled and in average attendance, also a corresponding increase in the number of teachers employed.

There are now in the schools of the county, two-hundred and eight teachers with an average of forty-three enrolled pupils to each teacher.

A County Institute was held during the first week of September last, which was regularly attended by ninety-seven per cent. of our teachers, and which in every important particular proved entirely successful.

The valuable aid of Prof. and Mrs. Newell and of Prof. George Smith of the State Normal School, are gratefully acknowledged and have been fully appreciated.

Drawing has been introduced into all the grades of all the schools of this county, the teachers having been required to prepare themselves as far as practicable to give instruction in this branch.

Enough has not as yet been seen of the practical workings of this new departure to justify any decided expression of opinion as to results, but from all quarters come encouraging reports of the great pleasure which the children take in the work and the facility of execution which many of them show.

In October of the current year a new brick building, with accommodation for 250 pupils was completed at Hancock and the structure is admitted to be not only admirable in arrangement, but completed in a style which makes it an ornament to the town. The cost was about $45,500.

WORCESTER—CLAYTON J. PURNELL.

For a long time past the Public School system has been very popular in this county, and the rapid advance of education to the front has been plainly marked year by year.

During the three years of my incumbency four teachers have been added to the roll, and nearly three thousand dollars have been expended in building and furnishing new shool houses. The additional expense incurred in the employment of teachers and sustaining new schools has been wisely met by sufficient appropriations made by the County Commissioners, and although in a greater extent the tax-payer is burdened by reason of the growing needs of our public schools, the tax-gatherer hears no complaint. This state of affairs together with the disappearance of private schools from our midst furnishes the strongest proof of the healthy progress of public education.

Generally speaking, the teachers here are hard workers in the discharge of their duties and are fully alive to the requirements of their profession. The Examiner's effort has been to impress upon the teachers the importance of properly grading their schools. In a few instances he has been compelled when making official visits to overrule the entire course of instruction adopted by the teacher and spend sufficient time to thoroughly examine the pupils and grade them according to the authorized method. The result of such work has been in every case gratifying alike to the teacher and himself.

In December last an Institute was held at Snow Hill, which was attended by all teachers in the county with the exception of six, who were absent on account of sickness or other good cause. This meeting was for two days, and it is believed was a success; for authority upon this question, however, I would cite Prof. M. A. Newell and W. H. Dashiell, Esq., both of whom were present and contributed in no small way towards such a result.

At the very close of the year steps have been taken to organize Reading Circles, one in connection with the Snow Hill High School, and the other with the Berlin High School. I expect to be able to give a full and satisfactory report of these and others by the time for the next annual report.

The Snow Hill High School has organized during the last year a circulating library, the circulation being confined to the teachers and pupils of the four higher rooms. The School Board has fostered the undertaking by providing suitable book cases and donating the amount fixed by law. Nearly two hundred dollars have been invested in good and useful books.

The system of three district school trustees now in use, has been the source of much trouble and annoyance to the School Board, owing principally to disagreements among the trustees as to the appointment of teachers. The consideration of a better plan is respectfully suggested.

Report of the Secretary.

Although the total expenditure for public school purposes this year has been rather less than the year preceding, unmistakable progress has been made in most of the counties, though, perhaps, not in all. In the State as a whole, it has been a year of revival. This may be attributed to several causes, operating in different degrees in different localities—the increased energy of the School Examiners; the increased efficiency of teachers' associations, district, county and State; the operations of the "State Teachers' Reading Circle;" the greater appreciation by the people of the value of public schools; and the increased enthusiasm and efficiency of the teachers, stimulated by the causes mentioned.

The School Examiner.

It has long been recognized as true, that "as is the teacher so is the school;" it is equally true, that as the examiner so is the system of schools which he represents and superintends. He has the eyes to see, the brains to direct, the hands to execute. Without his aid, or in spite of his ignorance, there will be in the county some good schools, because there are always some independent and self-reliant teachers. But without the master mind and the master hand there can be no efficient, uniform system. Maryland is blessed in having many examiners of long experience —one from the beginning of the system in 1865, several from its reorganization in 1868, and only a very few of less than 6 years standing. It is to be earnestly hoped that the conservative principle will prevail, and that local politics will be excluded from any participation in the administration of the public schools.

District and County Associations.

These have been more numerous, more interesting, and more largely attended than ever before. Being voluntary associations, they have some advantages over the Teachers' Institute, attendance on which is compulsory. There are also some disadvantages, on which it is needless to animadvert, as there is an easy remedy in the hands of the school authorities.

Teachers' Institutes.

I have attended a large number during the year, and by personal observation can testify to the almost universal attendance of teachers, to their intelligence and enthusiasm, to the great interest manifested by the non-professional public, and to the favorable influence exerted upon both the teachers and the citizens who attended the meetings.

State Teachers' Association.

The large and enthusiastic gathering at the Blue Mountain House, in July, is another evidence of the revival which has been mentioned. The location is one of the most beautiful in Maryland; but more beautiful still than the natural scenery was the evidence of intelligence, learning, professional ability, earnestness in the good cause, and hearty good will toward each other which was so conspicuously manifested at this meeting. It has been suggested, and the suggestion is worth considering, that a more permanent form be given to this organization by having it incorporated under the laws of the State.

State Teachers' Reading Circle.

This association was organized at the meeting of the State Teachers' Association, in July, 1888, and the beginning was made in September following. The City Superintendents, and a majority of the County Examiners, have taken hold of the work with great zeal, and have stimulated and encouraged the teachers to join the circles for their own improvement, directly; and indirectly for the promotion of public education. Over 1000 teachers enrolled themselves as members during the school year. With the universal co-operation of the Examiners this number could easily be doubled. The directors have decided to have a four years' course, and to apply to the State Board of Education and to the Legislature for an honorable and practical recognition of those who complete the course satisfactorily. A certificate is awarded on a completion of the course for each year and a diploma at the end of four years. The books selected for the first year's reading, are: Swett's Methods of Teaching, Allen's Mind Studies, and Mackenzie's History of the Nineteenth Century: for the second year, Fitch's Lectures on Teaching, and Green's Short History of the English People.

Many testimonials have been received from examiners and teachers of the value of such a course of reading. One says:

"For us I think the horizon is lifting and the new day is dawning. Never in the history of this country has better work been done by our teachers, and I attribute it in part to the good influence of the Reading Circle."

Another Examiner writes: "New Circles are being organized over the country, and I fully believe that every teacher will finally become a member. At the last Circle many prominent citizens were present who expressed their approval of such an organization, and volunteered any encouragement they could give to add to the success of the movement." Another says: "Our Circle is now built upon a sure foundation. From what has been accomplished in the past year I have no hesitation in asserting that we shall accomplish a still greater amount of good during the succeeding year."

Another writes: "The Reading Circle has unquestionably been productive of much good in our country. That a well arranged and systematic course of reading could be otherwise than beneficial, none but those whom it could not benefit would dare maintain. Most of our progressive teachers have joined the Circle, and the outlook is very encouraging." Another writes: "I think the Circle of practical benefit to our teachers, and it shall have my sincere co-operation in this county." A teacher writes: "Swett's Methods of Teaching is such a splendid book that I should not like to teach without it, and I fear I never would have known it had I not joined the Reading Circle." Another teacher writes: "I have always been a fairly good student, but I have learned more during the past year than in all my previous life. I ascribe a very large amount of this improvement to the Reading Circle, which has induced me to make research concerning a variety of subjects." Another says: "I am sure I voice the sentiments of our Circle when I say that we have been greatly benefited by the Reading Circle. We have been stimulated to original and thorough study." Another says: "I thought I had no time for Reading Circle work; but I find that by an economical arrangement of my leisure hours, I can accomplish a great deal. I shall never regret the time spent in this way."

Association of Public School Commissioners.

This body held its first meeting in the Fall of 1865, and has met every year until the present time. The last meeting in November, 1889, was not the largest, but probably the most interesting of the series. The President, Eben F. Perkins, of Kent county, read a very thoughtful and suggestive paper which I reproduce with some omissions and considerable abridgement:

Address of the President.

"The excellence of our present school law is proven by the fact that for fifteen years there has been no material change; and I have thought it would be strictly in the line of this association

to recall your attention to a few of its provisions and offer some suggestions for its execution. The first section of the law provides that there shall be throughout the State a *general* system according to the provisions of the Act. A fair construction of this language is, that it shall be a uniform system so far as the law provides. To make the system uniform, it is necessary that each commissioner, each trustee and every teacher, should be familiar with the law, and a copy of the Act of Assembly should be in the hands of each of them; and as the Act gives the By-Laws passed by the State Board, not at variance with the Act, the force of law, a copy of the By-Laws passed by the State Board should accompany them. But owing to the frequent change in the By-Laws I think it unwise to have them bound together. I find a general lack of knowledge of the law on the part of trustees, and also largely on the part of teachers. Are the provisions of the law familiar to the Commissioners? The By-Laws provide that the Examiner shall, as opportunity offers, address the people on educational topics. Would it not be well for the Examiner, at least once in every two years, to call a meeting of the trustees in each Election District, and address them on the subject of their duties? During the first year of my appointment I pursued this plan, and the good effect was apparent for a number of years. I am one of those who regard the trustees as a valuable part of our system. They are the connecting link between the County School Board and the people. But aside from this I find the trustees valuable assistants in executing the law. Where else could the selection of teachers be so well placed as in the hands of the local boards? To place this in the hands of the Examiner is not to be considered for a moment, to place it in the hands of the commissioner would be no gain. The local boards have a better opportunity to consult the wishes and needs of the school district than the county board. The law provides for the appointment of trustees in May. There are several reasons why this is not a suitable time; it is too near the end of the school year to determine whether a change of teacher is desired. Then it frequently happens that a trustee, appointed in May, will remove from the district at the end of the year. The strongest reason however, is, that at this time agricultural communities are so actively engaged in their work that they will not take the time to organize; and as the busy season over-laps the school year, the school is legally without a board of trustees. I believe their appointment in January would obviate all of this trouble.

"The prompt and regular payment of the County School Tax is matter of first importance to all of us. Section V, chapter 4, of the school law provides that the County School Tax shall be paid

quarterly on the days fixed for the payment of the State School Tax, viz: within ten days from the 15th of June, the 1st of October, the 1st of January, and the 15th of March respectively, in each year. I have taken the position that one fourth of the County School Tax, levied for each year, is due and payable on the 10th day of October. If I have given the proper constructions to these provisions of the law, the collector who fails to comply therewith, is by the 42nd section liable to a fine of from one hundred to five hundred dollars.

"The By-Laws prescribe a classification and schedule of studies in all primary schools, and in graded schools and high schools to which they are applicable. I learn however, that, in some counties a different schedule is observed. Pupils are constantly moving from school to school in the same county, and when they are presented to a different schedule of studies at each removal, there is a consequent loss to the pupils. In my own county we observe the schedule prescribed by the by-laws, and the classification is so uniform that I frequently find, in passing from one school to another, that like grades have had the same recitation on a given day. The last revision of the schedule raised the standard of the grades, and made the work of the first three grades difficult of accomplishment in the required time. The judgment of our teachers is, that it was an advance but not an improvement.

"The law makes it the duty of the Examiner to examine candidates for the profession of teacher, and to give certificates to such persons as are found qualified with the sanction of the County School Board. I think this sanction should be endorsed on the certificate. I have found that some holders of certificates have not been regularly examined; and I deem it a proper courtesy between the counties, that they should feel assured that the law has been strictly complied with. The school board of Kent county authorizes the Examiner in his discretion to endorse a certificate from another county in order to enable a teacher to be appointed to a school until the next examination. In the exercise of that discretion, I desire to be assured that the holder of a certificate from a sister county has passed a bona fide examination. I believe that the efficiency and progress of the schools demand an absolute compliance with the letter and spirit of the law in reference to certificates. As the law provides the same qualifications for teachers in all the counties of the State, would it not secure greater uniformity if the questions for examination were prepared by the State Board of Education, and sent to the several examiners; the examinations to be held on the same day throughout the State?

I have almost reached the conclusion that it would be well that assistant teachers should be appointed by the trustees, as the principals are, and not by the Board of School Commissioners. They should be as well qualified as principals and should receive the same compensation. Indeed I am entirely convinced that an incompetent teacher of the higher grades is less objectionable than one who has charge of the lower grades. When we wish to educate our young horses we entrust them to our most experienced trainers. We do not treat our children with equal consideration.

The law recommends county associations. My experience of their value is such, that I feel justified in urging them upon the attention of the commissioners; and I recommend that they be held on a school day, and so arranged that teachers' salaries be paid at the same time, securing a better attendance thereby. I heard a plain old teacher illustrate the value of these associations by comparing them to the time spent in sharpening the cradle blade in the harvest field.

As an additional aid to the teachers I would suggest that they be allowed once during the school year to visit and observe the methods of some other teacher, the teacher to be visited to be selected by the Examiner."

Professor Goodman's Paper.

Professor Jacob Goodman, one of the Directors of the State Teachers' Reading Circle, also read a very interesting and instructive paper. He divided his subject into three parts. 1st, the necessity of having good teachers. 2nd, the objects and purposes of the Reading Circle. 3rd, *Cui bono?* Want of space compels me to omit the discussion of the first topic and to abridge slightly the remaining portion of the paper. Under the second head Prof. Goodman said: "Having now attempted to show you the qualifications of a good instructor, and how absolutely necessary it is for us to have him, you will observe the object I have had in view by so doing, when I enunciate the proposition, that the Reading Circle has for its objects the cultivation of such teachers, by a system of self culture and self improvement.

This brings me to the second part of my address, that part which has immediate reference to my place upon the program of this day's exercises.

The Reading Circle.

At a meeting of the Maryland State Teachers' Association, held at Mount Lake Park in July, 1888, the question of elevating the moral and intellectual tone of the teaching force throughout the state came in for a great deal of private discus-

sion. It was remarked more than once that our sister states in the west were distancing us in the race for independence and pedagogic force of public school systems. The reason given for this may be embodied in one word—self-culture. The discussion did not end there. In a paper whose impression is still fresh upon my memory, Prof. Chaplain, Examiner for Talbot county, and a member of your association, urged the necessity of self-culture upon our teachers, and advocated the establishment of a Reading Circle throughout the state under the auspices and authority of the State Association. His valuable suggestion was at once agreed to, and resolutions were adopted by virtue of which a Board of Directors was chosen who, at once, in pursuance of directions laid down for them, formulated a plan looking to the intellectual self improvement of teachers of this state. It is, I believe, scarcely necessary for me to describe to you the avidity with which many of our teachers seized upon this long wished for opportunity for adding to their store of knowledge and pedagogic experience. Circles were immediately formed in thirteen of the counties and throughout Baltimore city, comprising full one-third of the teachers in the state. And you examiners and superintendents know better than any words of mine can tell you how effective the Reading Circle has been during the first year of its existence. I will make two assertions here in connection with the Reading Circle, the truth of which cannot be denied.

1st. The most earnest, progressive and conscientious teachers of this state are to-day included in our roll of membership.

2nd. Whenever the work of the schools has shown a marked improvement, the cause is directly traceable to the members of the Reading Circle. And now that I have made these two truthful statements, I think I may just as well make another just as truthful; and that is, if you wish to look for the careless and indifferent teachers, you will find them among that silent majority whose names are not to be found in our secretary's membership list.

The Board of Directors proposes to reward such teachers as accomplish satisfactorily the course of reading it prescribes by a certificate or diploma. That is all the reward we are able to offer. Do you see now, gentlemen, the force of the question "cui bono?" which I asked at the outset?

What good is it? We say to our members, you have been industrious; you have increased your efficiency as builders of character and moulders of mind; you have not only added to your own store of knowledge, but increased the wealth and strength of this commonwealth by your potent influence upon

the minds committed to your care; and for all this we will give you a diploma, which is worth intrinsically nothing more than the paper it is written on.

The peculiarity of this question lies in the fact that it has emanated from without; it comes not from our members so much as from those whose only stimulus is their monthly salary, whose main desire is to get the highest pay for the least service.

What good are your certificates, what benefit accrues from your diplomas, they ask? Do you perceive the selfish trend? Do you observe how the Reading Circle involuntarily divides the wheat from the chaff? How the disinterested, earnest and faithful worker is found within its limits, while without lies that unworthy class of teachers who like barnacles, or rather parasites, hinder and feed upon our pedagogic vitality?

In one respect, however, they are right. This is not the age for any one to work for glory, however disinterested or unselfish he may be. We are living in an age essentially utilitarian in its nature. Spring a new question in any community, and you are met with the question in return, what good is it? That is the question which is assailing the Board of Directors on every side, and unless we can give a satisfactory answer, we may as well cease to exist.

I seem to hear some one say, "well, what do you propose?" In answer thereto, I respectfully submit the following suggestions.

A diploma from the State Board of Directors shall be equivalent to a life certificate, and shall entitle the holder to an advantage in the matter of appointments.

This is the premium which we would like the state to place upon our certificates. If they are to be worth anything, that is the only way in which they can become of value, and unless they obtain that value we might as well save the trouble and expense of procuring and distributing them.

You represent a body whose influence is potent in the shaping of legislation, looking to the welfare and betterment of public education throughout this state. When questions concerning the public school system arise in our State Legislation, it is your advice which carries with it the weightiest influence, and when reforms are necessary, or improvements feasible, such reforms and improvements are nearer to adoption by the powers that be in proportion as they receive your unanimous approval and united support.

It might be apropos for me to state here that the School Board of Baltimore city at one of its meetings held last June, unanimously endorsed our project, and that the State Board of

Education at its meeting last fall, heartily approved the Reading Circle and urged its directors to go on, promising any assistance not contrary to law, and that it would seek any reasonable extension of the law in behalf of the circle. So you see that we are not wanting in moral support. And whilst the latter may tickle our vanity, it must be admitted that it amounts to very little in the end. It seems to me to be something like giving good advice to a hungry man. It adds a lot to his wisdom, but brings not a particle into his stomach.

We are like the hungry and the poor. We want something more than encouragement; we need support; we need legislation that will confer upon those holding our certificates or diplomas advantages over those who do not deem it worth their while to expend any time in self-culture; and it is for you to say, gentlemen, whether or not such legislative action shall be had."

Mr. Glenn H. Worthington, School Examiner of Frederick county, read a paper on the official relations of the County Examiner to his schools, which elicited considerable discussion and many warm commendations. I am sorry that I can only give the concluding paragraph. "In conclusion I regard the aims and ends to be reached by the County Examiner in his official relations to his schools, as fourfold: 1. To study the different theories and systems of education until he may be considered a specalist in school matters. 2nd. To determine what method of instruction is best adapted to his surroundings and to the youth whose welfare he seeks to promote. 3rd. To carry into effect his ideas, through the instrumentality of his teachers, whom he should constantly endeavor to improve and stimulate. 4th. To prepare public opinion to appreciate and support his efforts in behalf of education."

Colleges and Academies.

A comparison of tables L and M, with the corresponding tables last year, will show that the colleges and academies receiving state donations, which have made full reports according to the printed form, have all held their own during the year and some have made satisfactory advancement.

The Visitors and Governors of Washington College report that "during the last scholastic year there were thirty-seven students in attendance, four of whom were graduated with entire credit to the college and to themselves. The nine county scholarships under the Act of 1856, chap. 219, and the six under the Act of 1874, chap. 282, were all duly filled by students who received tuition, board, books and stationery free of charge; and five indigent scholars in addition have received free tuition. These scholarships are again all filled and there has been since

the beginning of the present scholastic year an increase of twenty-eight students, making the total present attendance sixty-five. Prof. Williams resigned his position as principal of the college, taking effect at the last commencement, and Dr. Charles W. Reid, of St. Johns' College has taken his place. The faculty is united and earnest in the prosecution of its work and the spirit of the students gives promise of a successful year."

Dr. Thomas Fell, President of St. Johns' College, reports that "this college celebrated its centennial in June last. Although the sphere of its activities has been restricted by various untoward circumstances, St. Johns', since the re-organization after the war, has accomplished a noble work; and no one at all familiar with the past can doubt that it has conferred far more upon the state than it has received. Last June six students graduated with the degree of B. A., four with B. S., three with that of B. L. one as M. E., and ten attained the post graduate degree of Master of Arts, in all twenty-five graduates. Fifty-two students have been matriculated this present session (1889, '90,) while the senior class numbers seventeen, all of whom hope to graduate next commencement. Great improvements conducive to the welfare of the students have been introduced by the Board of Trustees recently into the college buildings; all the rooms are now heated by steam and lighted by electricity; bath rooms have also been built in the boarding hall. A new professorship of modern languages has been created, and in order to provide for the increased number of students, the rooms in the Pinkney hall, hitherto occupied by the Treasurer of the college, have been assigned for the use of the faculty and students."

Johns Hopkins University.

The pecuniary difficulties, the anticipation of which for a time threatened to embarrass the free movements of the Johns' Hopkins University, have all been removed and no obstacles to its rapid expansion can now be foreseen. A double portion of the success which has attended the university thus far may reasonably be expected in the future.

Special Schools.

The remarks made in the last report respecting the State Normal School, the Normal School for the colored teachers, the School for the Blind, and the Schools of Art and Design in the Maryland Institute for the Promotion of Mechanic Arts apply so well to the same institutions now that it is unnecessary to repeat them.

The last visit which I made to the school for the Deaf and Dumb, at Frederick, confirmed me in the opinion which I have

heretofore expressed, that this is one of the best managed institutions in the state. It appeals to the State for support, not simply as a charity, but as an educational agency working at the most difficult educational problems with energy and success.

I ask special attention to the discussions of various educational subjects by several School Examiners, in the preceding pages. Their opinions do not always agree with my own, but they are the result of long experience, intimate acquaintance with the subject, unbiassed judgment, and a sincere desire to improve the school system both in legislation and administration.

M. A. NEWELL,
Secretary.

STATE TABLES.

TABLE A.—Population of Maryland According to the United States Census of 1880.

Counties.	Male.	Female.	Native.	Foreign.	White.	Colored.	Total.
Allegany	19,222	18,789	31,023	6,988	36,480	1,531	38,011
